Are you breeding MOSQUITOS?

[Read More >](#)

MaconMosquito.org

Mosquitos breed in plant saucers

Mosquitos breed in rain barrels that aren't covered with screening

IS THIS YOUR YARD?

Control Mosquitos in your yard.

DRAIN

All mosquitoes require water in which to breed. A small amount of standing water can be enough for a mosquito to lay her eggs. **LOOK AROUND EVERY WEEK** for possible mosquito breeding sites.

DRESS

Wear long sleeves and long pants to protect yourself during active biting times between **DUSK AND DAWN**. Light colored, loose fitting clothing is also advised.

DEFEND

Choose a mosquito repellent that has been registered by the Environment Protection Agency (EPA) for use when applied to skin and clothing.
